

VEHICLE EXPERTISE

for High Voltage Vehicles

INTRODUCTION

High safety restrictions for High Voltage applications because of the risk of an electrical shock.

CONTENT OF VEHICLE EXPERTISE

1. Risk assessment

The customer has to schedule the wind tunnel personal in working with the vehicle if the vehicle components are prototype parts or if the vehicle differs in general from the series version.

2. Isolation measurement

The High Voltage system was tested before the vehicle was transported to MAHLE Behr Climatic Wind Tunnel. The test result was successful.

3. EUP-Declaration

The document of electrical-training was handed to the MAHLE Behr Climatic Wind Tunnel personal as copy.

4. Modification of vehicle configuration

The procedure for integration of new parts in the High Voltage system of the vehicle has to be scheduled by the customer.
